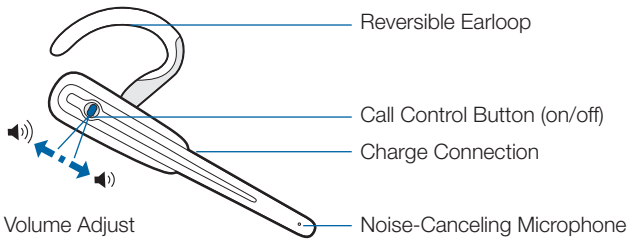
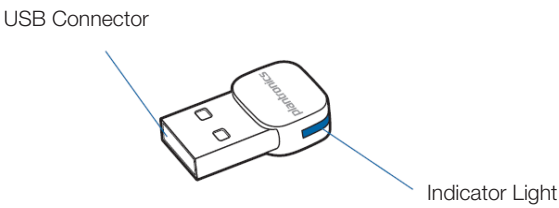
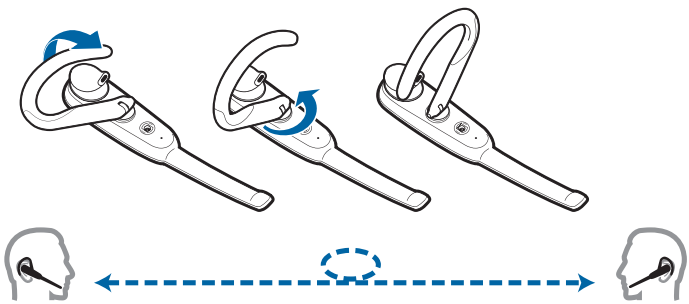
Product Features

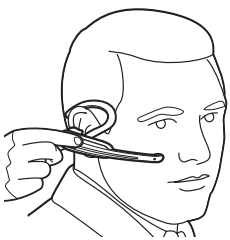




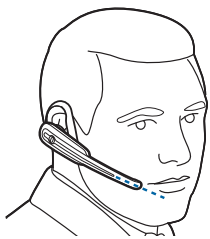
Wearing Your Headset



Your headset can be worn on your left or right ear. To switch from one ear to the other, flip the ear loop to the side, and twist around.

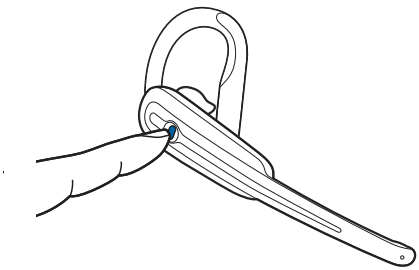


The ear tip should fit comfortably in the opening of your ear canal



Point the mouthpiece toward your mouth

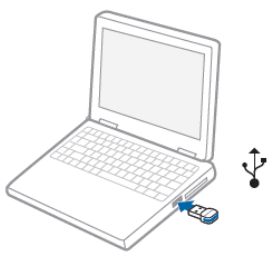
Powering Your Headset and USB Bluetooth Adapter



Powering up: Press and hold Headset button for about 4 seconds.
4 ascending beeps will sound when powered on.

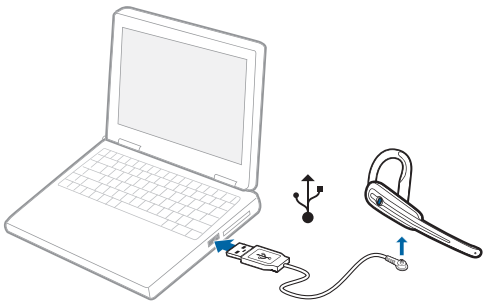
Powering down: Press and hold Headset button for 4 seconds.
4 descending beeps will sound when powered off.

NOTE For your convenience, the headset comes pre-paired with the USB Bluetooth adapter, and (if the headset is within range) will automatically connect to the adapter when powered on.



The USB Bluetooth adapter is automatically powered on upon inserting into the USB port of the computer.

Charging Your Headset



Before using, you must first charge your headset. The indicator light glows solid red while charging.

Charge the headset for a minimum of 2 hours.

Battery talk time is up to 8 hours.

NOTE Do not use headset while charging and do not connect the charger while headset is in use.

Headset Indicator Lights and Alerts

Headset Indicator Lights

Action	Button Action	Sounds	Indicator Lights
Turn headset on	Press and hold for 4 seconds	4 ascending beeps	Flashes blue every 10 seconds
Turn headset off	Press and hold for 4 seconds	4 descending beeps	
Turn microphone on/off	Press for 1 second	1 high beep	
Adjust volume	Press left or right (not inward)	2 beeps when max/min volume reached	

Headset Alerts

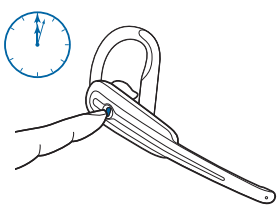
Alert	Sounds	Indicator Lights
Low battery	3 beeps every 30 seconds	Flashes red 3 times every 3 seconds
Charging		Glows solid red

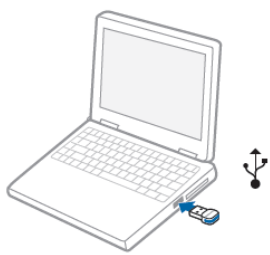
USB Bluetooth Adapter Indicator Lights

Action	Indicator Lights
Disconnected from the headset	No LED
Connected to the headset	Solid blue
Radio link active	Flashes blue
Pairing mode	Flashes blue rapidly

Pairing Your Headset with the USB Bluetooth Adapter

NOTE The Bluetooth USB adapter comes pre-paired to the headset; however, if you find that you need to pair your headset to the adapter again, you can do so by performing the following steps.





1. Start with the headset powered off.
2. Press and hold the power button for about 5-6 seconds until the light on the headset starts flashing an alternating red-blue. Release the power button.
3. Insert the Bluetooth USB adapter into the computer. Once the devices pair successfully, the LED on the headset stops flashing.

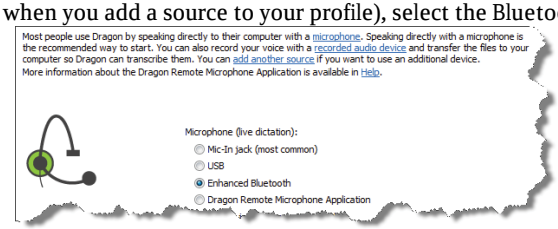
Adjusting Computer Audio Settings

1. On your PC, launch the Control Panel and select **Sound**.
2. On the Sound dialog, make sure the **Plantronics Bluetooth Adapter** is selected as the default device in the **Playback** and **Recording tabs**.
3. Press **OK**.

Using Your Headset with Dragon NaturallySpeaking

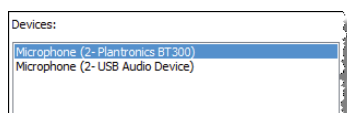
1. Make sure the headset is fully charged and powered on (pg. 4) and the USB adapter is connected to your computer. You must stay within 33 feet of your computer to use the headset.
2. Press the headset button for1 second to activate its link to its adaptor. When the headset microphone turns on, you will hear 1 beep and the light on the USB adapter will go from solid blue (standby) to flashing blue (active).

   NOTE When the headset microphone is on, the battery will drain faster than when the headset is in standby mode. To preserve battery life/talk time you should turn off the headset microphone between uses.
3. When Dragon shows its list of audio device types (during profile creation or when you add a source to your profile), select the Bluetooth source.



Most people use Dragon by speaking directly to their computer with a microphone. Speaking directly with a microphone is the recommended way to start. You can also record your voice with a recorded audio device and transfer the files to your computer so Dragon can transcribe them. You can add another source if you want to use an additional device.
More information about the Dragon Remote Microphone Application is available in Help.
Microphone (live dictation):
Mic-In jack (most common)
USB
Enhanced Bluetooth
Dragon Remote Microphone Application

4. If Dragon prompts you to “Choose the device you will use for speech recognition”, select **Plantronics BT Adapter** from the list and then click **Next** to continue.



5. If Dragon tells you that your “Sound level is too low”, the headset microphone may be turned off. Make sure that it is turned on and try reading the text again.

NOTE If after following the above steps, you still receive the “Sound level is too low” message from Dragon, your Windows sound system may not be setup correctly. Visit http://support.nuance.com

6. When dictating with Dragon using your headset, please note that when your headset microphone is turned on, you must also turn the microphone on from inside of Dragon. To turn on the microphone from Dragon, press the plus key (+) on the numeric keypad or click the microphone button on the DragonBar.
   (The + is the default hotkey; you can modify this and other Dragon defaults by choosing "Options" from the DragonBar's Tools menu.)

The microphone is off

The microphone is on

NOTE Even when the Dragon microphone icon is red and horizontal, indicating that the microphone is off, your headset microphone may still be on. When you are done using Dragon, you may want to make sure that your headset microphone is on standby. The USB adapter will be solid blue in standby mode and flashing blue when headset microphone is on/active. You can also turn off your headset to conserve battery life.

NOTE If the Plantronics BT Adapter isn’t displayed in step 4 or if you are prompted to run audio training when you’ve already done it before, you may need to unplug and replug the USB Bluetooth adapter.

Various resources for using Dragon NaturallySpeaking efficiently are on www.nuance.com/dragon . They include videos and illustrated written material with many tips, as well as partners who provide individualized services remotely or in person.

In addition, the Support page contains a KnowledgeBase with the latest technical details, and a Forum where a wide range of users exchange information.

Using the Headset with Dragon Dictate

When creating a new user profile within Dragon Dictate for your headset, note the following:

1. If you have not activated Enable Access for Assistive Devices in the Universal Access section of your System Preferences, you will be prompted to do so before you can continue.
2. Next, you will need to create a user profile so that Dragon Dictate can get used to your voice, your microphone, and your speech. You will see a blank Profiles Window.
3. To create a profile, click the “+” button. This will let you enter a profile name and select your microphone type and the language for your profile.
4. Select the Plantronics BT Adapter from the Microphone pull-down menu.
5. Select the spelling model that best suits you from the Spelling pull-down menu, and then choose the Accent.
6. When you have verified your choices are correct, click the Create button.
7. After a short wait, Dragon Dictate will create your profile.
8. Be sure that the headset is active and ready for use. The light on the USB Adapter will flash blue when the headset is active. To switch between active and standby, press the headset button for under one second.
9. To conserve battery life, place the headset in standby when not in use. The light on the USB Adapter will remain solid blue to indicate that the headset is in standby.

For further information, and to learn how to use Dictate, see the Dragon Dictate User Manual.

Regulatory Notices

FCC Requirements Part 15

This device complies with part 15 of the FCC Rules subpart B. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and

(2) This device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

— Reorient or relocate the receiving antenna.
— Increase the separation between the equipment and receiver.
— Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
— Consult the dealer or an experienced radio/TV technician for help.

EXPOSURE TO RF RADIATION

The internal wireless radio operates within the guidelines found in radio frequency safety standards and recommendations, which reflect the consensus of the scientific community. Independent studies have shown that the internal wireless radio is safe for use by consumers.

Visit www.plantronics.com for more information.

Industry Canada Notice

This Class B digital apparatus complies with Canadian ICES-003.
Cet appareil numérique de la classe B est conforme à la norme NMB-003 du Canada.
